Dear Mr. McDonald:

⁵⁹⁵⁰
Docket No. 71-9067, Certificate of
Compliance for the Model BCL-4
Shipping Cask

Battelle's Columbus Laboratories requests a renewal of the subject Certificate of Compliance for an additional five (5) years. The cask configuration, containment, and contents remain the same as for the current certificate which expires on September 30, 1981.

The Safety Analysis Report for Transportation (SARP) for the BCL-4 cask has been reorganized into the standard SARP format recommended by the NRC and outlined in Regulatory Guide No. 7.9. Two new sections have been added. They include Section 7 (Operating Procedures) and Section 8 (Acceptance Tests and Maintenance Programs). Other additions, primarily descriptive in nature, have been made to the other sections. All the analyses are unchanged except for minor corrections such as typographical errors. All pages which contain new material or corrections are identified by the legend "Rev. A. 8/7/81" at the center of the bottom page margin. If only part of the page contains new material, that portion of the page is identified by a solid vertical bar in the outside margin. When the only change consists of a new heading or subheading, the legend and the vertical bar have been omitted.

Enclosed are eight (8) copies of the revised SARP for the BCL-4 cask. Also enclosed is a check for \$2800, the fee for review for a minor amendment as defined in Paragraph 170.31(11)(B) of 10 CFR 170.

I apologize for submitting this request so close to the expiration date of the cask. If there is anything I can do to assist your review so that we can continue uninterrupted use of the cask, please call me at FTS 976-7502.

Sincerely,

Richard J. Burian
