Mr. L. L. Kintner
Division of Project Management
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Kintner:

Reference: Enrico Fermi Atomic Power Plant, Unit 2
NRC Docket No. 50-341

Subject: Regulatory Requirement Review Report

Detroit Edison hereby submits 63 copies of its Enrico Fermi Unit 2 Regulatory Requirements Review Report. This report is being submitted in response to the NRC Staff's request as stated in the Enrico Fermi Unit 2 Safety Evaluation Report dated July 10, 1981 (Section 1.8.1, "Prelicensing Issues").

Because of the continuing nature of the licensing review process, certain responses made in the report represent commitments which have been made by Detroit Edison but which are still in the process of being implemented. In all such cases, Detroit Edison fully intends to satisfy the NRC regulatory requirements, or have received authorization from the NRC to use acceptable alternative criteria, prior to plant operations.

Sincerely,

Harry Tauber
