Docket Nos. 50-338
50-339
License Nos. NPF-4
NPF-7

Gentlemen:

AMENDMENT TO OPERATING LICENSES NPF-4 AND NPF-7
NORTH ANNA POWER STATION UNITS NO. 1 AND NO. 2
PROPOSED TECHNICAL SPECIFICATION CHANGE

Pursuant to 10 CFR 50.90, the Virginia Electric and Power Company requests an amendment, in the form of changes to the Technical Specifications, to Operating Licenses NPF-4 and NPF-7 for the North Anna Power Station, Units No. 1 and No. 2. The proposed changes are enclosed.

The proposed changes revise the requirements for determining the Quadrant Power Tilt Ratio when above 75 percent rated thermal power with one Power Range Channel inoperable. The proposed changes for North Anna Unit 1 are provided in Attachment 1. The proposed changes for North Anna Unit 2 are provided in Attachment 2. The discussion of the changes is provided in Attachment 3.

This request has been reviewed and approved by the North Anna Station Nuclear Safety and Operating Committee and by the Safety Evaluation and Control staff. It has been determined that this request does not pose an unreviewed safety question.

We have reviewed this request in accordance with the criteria in 10 CFR 170.22. Since this request involves a safety issue which the Staff should be able to determine does not involve a significant hazards consideration for Unit 1 and a duplicate safety issue for Unit 2, a Class III license amendment fee and a Class I license amendment fee are required for Unit 1 and Unit 2, respectively. A voucher check in the amount of \$4,400.00 is enclosed in payment of the required fees.

Very truly yours,

R. H. Leasburg
