AUG 4 1981

Virginia Electric and Power Company  
ATTN: Mr. J. H. Ferguson  
Executive Vice President-Power  
P. O. Box 26666  
Richmond, VA 23261

Gentlemen:

Subject: 50-280/81-20 and 50-281/81-19

This refers to the routine inspection conducted by Mr. A. Tillman of this office on July 6-10, 1981, of activities authorized by NRC License Nos. DPR-32 and DPR-37 at Surry 1 and 2 facility and to the discussion of our findings held with you and members of your staff at the conclusion of the inspection.

Areas examined during this inspection included your physical security program as implemented under the provisions of Title 10, Code of Federal Regulations, Part 73, "Physical Protection of Plants and Materials", and the specific requirements of your approved Security Plan. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, performance tests, and observations by the inspector.

During the inspection, it was found that certain activities under your license appear to violate NRC requirements. These items and references to pertinent requirements are listed in the Notice of Violation enclosed herewith as Appendix A. Details of activities involving safeguards and security measures are exempt from disclosure in accordance with 10 CFR 2.790(d). Therefore, your response should be incorporated in a separate paper and referenced in your reply.

One new unresolved item resulted from this inspection and is discussed in the enclosed report. This item will be examined during subsequent inspections.

In accordance with Section 2.790(d) of the NRC's "Rules of Practice", Part 2, Title 10, Code of Federal Regulations, activities involving safeguards and security measures are exempt from public disclosure; therefore, the enclosures to this letter with the exception of the report cover page, which is an inspection summary, will not be placed in the Public Document Room.
