Attn: Dr. B. J. Snyder, Program Director
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit 2 (TMI-2)
Operating License No. DPR-73
Docket No. 50-320
TMI Unit 2, Recovery Quality Assurance Plan

Your letter of June 29, 1981 stated that you found our response dated April 24, 1981 (LL2-81-0104) to your letter of March 20, 1981 was acceptable with the following exception. The next revision to the TMI-2 Recovery Quality Assurance Plan should make reference to the final issuance of Revision 1 to Regulatory Guide 1.58 dated September 1980 rather than the July 1979 version. We agree to do this, but with the same exceptions stated in our April 24, 1981 letter.

Your letter of June 29, 1981 also requested that we respond to generic letter 81-01, "Qualification of Inspection, Examination, and Testing and Audit Personnel." This generic letter requested that we supply a commitment to meet regulatory positions G.5, 6, 7, 8 and 10 of Regulatory Guide 1.58, Revision 1, and Regulatory Guide 1.146 or describe our alternative method of compliance. Additionally, you requested our planned date for implementing this commitments. Our letter dated April 24, 1981, which you found acceptable as stated in your June 29, 1981 letter, supplied our position on these regulatory guides with the exception that we reference the July 1979 vice the September 1980 version of Regulatory Guide 1.58. As stated above, we will comply with the September 1980 Revision of Regulatory Guide 1.58, with the same exceptions noted in our April 24, 1981 letter. We have already implemented our commitments with respect to these Regulatory Guides and as stated above these commitments will be reflected in the next revision of the Recovery QA Plan.

Sincerely,

G. K. Hovey
Vice-President and
Director, TMI-2
