Mr. Charles E. MacDonald, Chief
Transportation Certification Branch
Division of Fuel Cycle and Material Safety
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Reference: Docket No. 71-6375

Dear Mr. MacDonald:

We respectfully submit our response to the questions posed by your April 2, 1980 letter (Attachment 1) regarding the Model CNS 4-45 (PB-1) shipping package.

Our response is in the form of revised pages (Attachment 2) to the Safety Analysis Report. In accordance with the suggestion in Regulatory Guide 7.9, we have identified the revision by a vertical line in the right margin. We ask that you insert the revised text into the original binder sent to you on November 26, 1979.

Our letter of September 8, 1980 contained a summary of modifications to the Safety Analysis Report which included the removal of fuel and neutron source component provisions.

Please do not hesitate to contact us with any questions regarding this matter.

Sincerely,

CHEM-NUCLEAR SYSTEMS, INC.

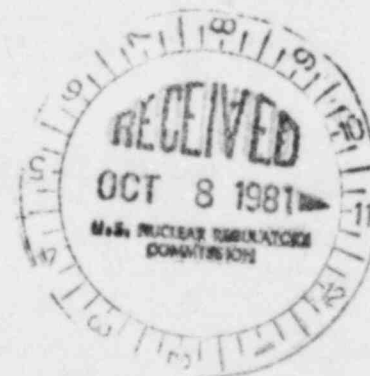

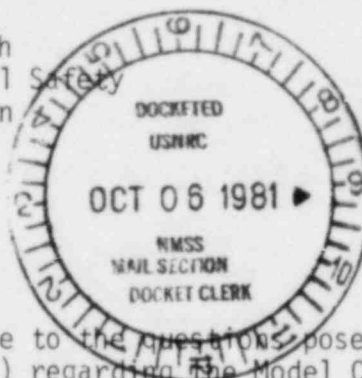

Cheryl A. Marsh
