

THE CINCINNATI GAS & ELECTRIC COMPANY

E. A. BORGMANN  
SENIOR VICE PRESIDENT

Docket No. 50-358

October 16, 1981

Mr. Harold Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

RE: WM. H. ZIMMER NUCLEAR POWER STATION -  
UNIT 1 - FISSION GAS RELEASE ANALYSIS

Dear Mr. Denton:

This is in response to the August 21, 1981 NRC letter from B. J. Youngblood to E. A. Borgmann. The letters referenced in that NRC August 21, 1981 letter, R. E. Engel (GE) to T. A. Ippolito (NRC), "Extension of ECCS Performance Limits", dated May 6 and May 28, 1981 are not applicable to Zimmer. These letters generically address fission gas release from fuel at high burnup for operating BWR-2, 3, and 4's.

The General Electric letter MFN-155-81 to R. L. Tedesco (NRC) from R. M. Pifferetti (GE) dated August 21, 1981 supplies the information required to extend the positions stated in the May 6 and May 28 letters to GE fueled BWR-5 and 6's that are seeking operating licenses. Please reference the General Electric letter dated August 21, 1981, MFN-155-81, on the Zimmer Docket.

Very truly yours,

THE CINCINNATI GAS & ELECTRIC COMPANY

By *E. A. Borgmann*
