Washington, D.C. 20006

Gentlemen:

This letter is in response to your letter of September 22, 1981 to Boyce Grier wherein you requested copies of all inspection reports for Limerick Generating Station be sent to you before completion of the 10 CFR 2.790 review by the Philadelphia Electric Company.

Region I's practice on distribution of inspection reports is that a report is not distributed to the public until the company has a reasonable opportunity to have the report reviewed for proprietary information. Normally, twenty-five days from date of transmittal is allowed for this review. Moreover, Region I's policy is that requests from the public for copies of inspection reports prior to the completion of the proprietary review are not accepted unless concurred in by the company. Consequently, I discussed your request with Mr. J. S. Kemper of the Philadelphia Electric Company. He agreed that your firm should receive copies of our inspection reports on the Limerick Generating Station concurrent with our transmittal of the inspection reports to the Philadelphia Electric Company for their proprietary information review. We will, therefore, grant your request.

For your records: Mr. Grier recently retired from Federal government service. I am pleased to have been of service to you.

Sincerely,

Original Signed By:  
Ronald C. Haynes  
Director
