OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

NRC
10/6/81
San Onofre Licensing Proc.
Washington, D.C.

Dear People:
Please stop licencing
the San Onofre Nuclear
Generating Station (SONGS).
It has been in operation
only 46 days in the past
17 1/2 months. Operated only
22% of the time in 1980. I
we can no longer afford
the cost of nuclear power
production. How can a
plant be economical & safe
when there are so many
malfunctions. I really
don't think you or S. Cal.
Edison know what the
hell you are doing. Please
stop your madness. This
world has survived a

long time without nuclear
power but I really question
how long we will all
survive with it.

Peace & Joy;
Richard Holman

P.S. - Please keep
Nukes shut down!
