Dear Sirs:  
I strongly support research into conversion of Diablo into a non-nuclear facility. I accept nuclear power as energy of the present + future but because of the earthquake risk, low level radiation, nuclear waste disposal problems (which aren't totally resolved at this time), and faulty security preparations, I firmly believe the plant at Diablo Canyon would be a serious danger to life in this area. Please think about it some more. Thank you.

P.S. I support the NAB if a testing permit is granted.
