Director
Office of Nuclear Reactor Regulations
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Director:

Enclosed are revisions to pages 90 and 91 of the Reactor Containment Building Integrated Leak Rate Test Report, dated April 4, 1977.

The revisions, indicated by a vertical bar in the margin, are as follows:

- 1) Page 90 - the September 14, 1975 test data for penetrations N231 A & B was not included in the report.
- 2) Page 91 - the test on MSIV 80B was incorrectly reported as taking place on December 29, 1976. The correct data should be December 26, 1976 with 282 SCCM leakage.
