Mr. Arne Olsen
Senior License Administrator
Babcock & Wilcox
Lynchburg Research Center
Lynchburg, Virginia 24505

Dear Mr. Olsen:

We have reviewed the Reactor Security Plan for the Babcock & Wilcox Lynchburg Research Center, submitted by letters dated June 3, 1981 and July 9, 1981, and have determined that the plan meets the requirements of 10 CFR 73.67 - Special Nuclear Material of Low and Moderate Strategic Significance.

Accordingly, we have amended license Nos. R-47 and CX-10 as follows:

The licensee shall follow the "Lynchburg Research Center Reactor Security Plan" submitted by letter dated June 3, 1981, as revised by letter dated July 9, 1981.

Inasmuch as B&W is now dismantling the Lynchburg Pool Reactor (LPR), the Physical Security Plan for License R-47 will be terminated upon completion of the dismantling of the LPR and will pertain to License CX-10 only.

Any Physical Security Plan for the remains of the LPR will, in accordance with the dismantling plan, become part of SNM-778.

If you have any questions concerning the above, please contact the Project Manager, Harold Bernard (301) 492-9799.

Sincerely,

ORIGINAL SIGNED BY:

James R. Miller, Chief
