Docket No. 50-397

Mr. R. H. Engelken  
U.S. Nuclear Regulatory Commission  
Region V  
1450 Maria Lane  
Suite 210  
Walnut Creek, California 94596

Dear Mr. Engelken:

Subject: SUPPLY SYSTEM NUCLEAR PROJECT NO. 2  
10CFR50.55(e) POTENTIALLY REPORTABLE CONDITION #73  
CONTRACT 215 CONCRETE AND GROUTING WORK

An interim report was forwarded on this condition on August 17, 1981. To date no documentation on grouting has been received from the contractor. The Construction Manager is expediting the need for these records with the contractor.

Burns and Roe has issued PED 221A-CS-0020 to Pacific Testing Laboratories to develop and implement a microcoring test program. The correlation of these tests on microcoring compared to other tests will determine strength characteristics of the grout.

We will issue an updated or final report by December 15, 1981.

Very truly yours,

*R. G. Matlock*
