Docket No. 50-302
License No. DPR-72

As a result of the inspection conducted on August 31 - September 4, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violations were identified.

- A. Technical Specification Section 6.4 requires a retraining and replacement training program for the facility staff that meets or exceeds the requirements of Section 5.5 of ANSI N18.1-1971. Section 5.5 requires a training program to maintain proficiency of the operating organization.

Contrary to the above, the facility training program does not provide retraining of security personnel in health physics requirements.

This is a Severity Level VI Violation (Supplement I.F).

- B. 10 CFR 50, Appendix B, Criterion XVII requires the licensee to establish requirements concerning record retention including location of quality related records. The licensee's accepted QA Program (FSAR) Section 1.7.6.7.1.8 states that ANSI N45.2.9 requirements will be met. Section 5.6 of ANSI N45.2.9 requires that record storage facilities be capable of protection from possible destruction such as fire.

Contrary to the above, storage of quality assurance records are not being maintained in accordance with Section 5.6 of ANSI N45.2.9-1974 in that training records for Nuclear QA/QC personnel are not being stored in fire rated facilities.

This is a Severity Level VI Violation (Supplement I.F).

Pursuant to the provisions of 10 CFR 2.201, you are hereby required to submit to this office within thirty days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violations; (2) the reasons for the violations if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will be taken to avoid further violations; and (5) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation.
