

October 26, 1981

Docket No. 50-470

Mr. A. Scherer, Director  
Nuclear Licensing  
C-E Power System  
Combustion Engineering  
1000 Prospect Hill Road  
Windsor, Connecticut 06095

Dear Mr. Scherer:

Subject: Unresolved Safety Issues Applicable to CESSAR-F

Reference: (a) Letter, J. R. Miller to A. E. Scherer, dated  
September 3, 1981  
(b) Letter, A. E. Scherer to D. G. Eisenhut, dated  
October 8, 1981

Our reference (a) letter requested that you provide us with a summary description of investigative programs and the interim measures you have devised for dealing with the Unresolved Safety Issues that fall within the scope of CESSAR-F. The applicable unresolved issues include the following:

1. Water Hammer (A-1)
2. Steam Generator Tube Integrity (A-4)
3. Reactor Vessel Materials Toughness (A-11)
4. Steam Generator and Reactor Coolant Pump Support (A-12)

Your submittal provided in reference (b) was not responsive, in that you have not described any CE investigation programs or interim measures for dealing with these issues. As a result, we are unable to satisfactorily complete the appendix to the CESSAR Safety Evaluation Report that addresses this topic. Accordingly, we request that you provide us with a description of specific measures taken or to be taken to address these issues for CESSAR.

We will make every effort in the next few weeks to provide the appropriate staff to discuss this issue with you and your staff.
