

NOV 18 1981

Docket No. 50-334

Duquesne Light Company
ATTN: Mr. C. N. Dunn
Vice President, Operations
435 Sixth Avenue
Pittsburgh, Pennsylvania 15219

Gentlemen:

On July 29, 1981, the Division of Licensing completed the review of your application dated July 29, 1981, and issued Amendment No. 44 to License No. DPR-66 for your Beaver Valley Unit No. 1 facility. The application was for a Technical Specification change for the elimination of the Beaver Valley containment package exhaust and supply valve isolation time requirements. For this application, your Company paid a Class III fee of \$4,000 pursuant to 10 CFR 170.22.

The Division of Licensing staff have informed us that this application involved a review which was only administrative in nature. Therefore, a Class II fee of \$1,200 is applicable in lieu of the said Class III fee. Consequently, we are concurrently authorizing the NRC's Office of the Controller to refund a sum of \$2,800 to your Company. Refunds are generally processed in approximately two weeks.

Sincerely,

Original Signed by
Wm. O. Miller

William O. Miller, Chief
