

NOV 12 1981

Docket Nos. 50-254
and 50-265

Commonwealth Edison Company
ATTN: Mr. Louis O. DelGeorge
Director of Nuclear Licensing
P.O. Box 767
Chicago, Illinois 60690

Gentlemen:

Your application dated July 16, 1981, proposed certain Technical Specification (TS) changes for Unit Nos. 1 and 2 of the Quad Cities Station which would bring the Environmental TS non-radiological limits to correspond to those required of your Company by the NPDES permit. This application was filed with the Office of Nuclear Reactor Regulation (ONRR) for review and included a total of \$4,400 in fees pursuant to 10 CFR 170.22.

It has been determined that fees should not be charged for the deletion of non-radiological aquatic LCO's and other non-radiological monitoring requirements in cases where licensees have a NPDES permit. On this basis, we have concluded that an exemption, pursuant to 10 CFR 170.11(b), from the fee requirement is authorized by law and such exemption is otherwise in the public interest and is hereby granted for your July 16, 1981 application. Therefore, we have concurrently authorized the Office of Controller to refund you the \$4,400 paid with your application. Refunds are generally processed by the Office of the Controller within a two-week period.

Sincerely,

Signed, C. James Holloway, Jr.
