NOV 4 1981

Docket Nos: 50-354
 and 50-355

Mr. R. L. Mittl
 General Manager - Licensing &
 Environment
 Public Service Electric & Gas
 80 Park Plaza, T16D
 Newark, New Jersey 07101

Dear Mr. Mittl:

This letter is a request by the NRC staff for further information so that the staff can close out a matter relating to code compliance of certain components which were purchased for use in the Hope Creek Generating Station, Units 1 and 2.

In your letter requesting authorization to use the above mentioned components, a table was provided, based on an expected construction permit issuance in 1971, which listed the components, the date purchased, and the code and addenda to which the equipment was built. In order for the staff to determine whether these components were designed to assure the achievement of an acceptable level of quality and safety, it requests that code and addenda requirements which would have been applicable in November 1974, when the construction permits were issued, also be provided.

Further, based on the information flowing from these two sets of code requirements and addenda, the staff requests that an analysis of the difference between the two sets be provided for each component listed. When this additional information is received, the staff is of the opinion that a rapid resolution of this matter can be accomplished.

Sincerely,

A. Schwencer, Chief
 Licensing Branch No. 2
 Division of Licensing
