FREEDOM OF INFORMATION
ACT REQUEST

FOIA-81-241
Rec'd 6-22-81

U.S. Nuclear Regulatory Commission
Director, Office of Administration
Washington, D.C. 20555

Dear People:

Pursuant to the Freedom of Information Act, 5 USC 552, I hereby request documents related to the transportation of special nuclear materials in the form of spent reactor fuel. Spent fuel routes were made available to the public domain as a result of a law by Congress.

I would like to receive copies of documents which indicate spent fuel routes approved by the Nuclear Regulatory Commission since "Public Information Circular for Shipments of Irradiated Reactor Fuel," DRAFT NUREG-0725 was issued by the N.R.C. in September 1980.

I do not wish to receive safeguarded information, such as exact dates and times of shipments, safe havens, specific security provisions, or telecommunications information. I am making this request to expedite your response and am not relinquishing my right to appeal and request this information if it appears relevant after reviewing the conformed documents.

I also request that you waive fees for providing this information since the information requested "can be considered as primarily benefitting the general public." For more than three years our office has been coordinating research in our work with citizens' groups and government officials.

If you have any questions regarding this request, please telephone me at the above number.

I appreciate your prompt consideration of this request and look forward to your response within 10 working days as stipulated by FOIA.

Sincerely,

Jilian Mincer
