Gentlemen:

Subject: NRC Region I Combined Inspection Report Nos. 50-317/89-25 and
50-318/89-26

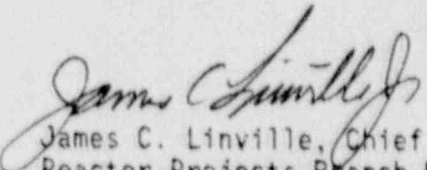

This transmits the October 3 - November 12, 1989, resident inspection findings by Messrs. D. Limroth, J. Golla, V. Pritchett and S. McNeil, at the Calvert Cliffs Nuclear Power Plant, Lusby, Maryland. Those findings were based on observation of activities, interviews, and document reviews, which have been discussed with Mr. Russell of your staff.

Of continuing concern are the corrective action program deficiencies identified during this inspection period and the symptom-oriented corrective actions associated with issues resulting from Special Team Inspection 89-200 and Confirmatory Action Letter 89-08. Your continued attention to upgrading your Corrective Action Program is warranted.

Apparent violation of NRC requirements are cited in Appendix A and categorized under the NRC Enforcement Policy, 10 CFR 2, Appendix C. A reply is required in accordance with Appendix A. The requirement that you reply is exempt from clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1980, PL 96-511.

Your cooperation with us is appreciated.

Sincerely,

James C. Linville, Chief
Reactor Projects Branch No. 1
Division of Reactor Projects
