Subject: Crystal River Unit 3
Docket No. 50-302
Operating License No. DPR-72
Licensee Event Report No. 88-007

Dear Sir:

In LER 88-007, dated April 1, 1988, Florida Power Corporation (FPC) reported that a supplement to the report would be provided. The expected submission date for the supplement was April 1, 1990.

An investigation and inspection of Building Spray Pump (BSP-1A), to be performed during the next refueling outage, determined the expected submission date. At the time the LER was submitted, the beginning of Refuel 7 was scheduled for September 25, 1989. Subsequent to the initial LER submittal, the refuel outage schedule was adjusted. The actual beginning of Refuel 7 was March 14, 1990.

Based on the delay imposed by the refuel schedule change, FPC is delaying the submittal of the supplement to LER 88-007. The expected submission date is October 1, 1990. Should there be any questions, please contact this office.

Sincerely,

G. L. Boldt
Vice President, Nuclear Production
