RE: Response to letter received 2/8/90 from your office.

Dear Mr. Caniano:

This letter is intended as the required written response to your letter dated February 5, 1990.

Two areas of violation were noted with reference to license #24-11858-02. Our response to these is as follows:

1) We agree the requirements for a visiting authorized user of our licensed material (Co 60) were not met at the time of inspection.

On January 4, 1990 I sent a letter to your office with information on the visiting authorized user. After sending that letter and prior to receiving written notification of this violation, I talked with Mr. Gary Shear who indicated more information would be necessary.

We have decided to request an amendment placing Dr. Kurichety on our license. This amendment request should follow this response letter in the very near future, most certainly by March 16.

2) With regard to the second violation, we did not have birthdates on radiation exposure records for two employees in Radiation Oncology. We have since corrected this problem by sending the appropriate information to the radiation monitoring company, Landauer. Our last two radiation film badge reports included the addition of the previously misplaced information.

This letter will hopefully be regarded as sufficient response to our violations of 10 CFR 35.27 (a) and 10 CFR 20.401 (A).
