President and Chief Executive Officer  
P.O. Box 411  
Burlington, Kansas 66839

Gentlemen:

This refers to the inspection conducted by Messrs. M. E. Skow and B. L. Bartlett of this office during the period March 1-31, 1990. This inspection pertained to activities authorized by NRC Operating License No. NPF-42 for the Wolf Creek Generating Station, and our findings were discussed with Mr. J. A. Bailey and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included plant status, onsite followup of events at operating power reactors, operational safety verification, monthly surveillance observation, monthly maintenance observation, refueling activities, spent fuel pool activities, preparation for refueling, review of licensee event reports, and followup on previously identified NRC items. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspectors. The inspection findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. However, this violation is not being cited because the criteria specified in Section V.G of the Enforcement Policy were satisfied, as described in paragraph 5 of the enclosed inspection report. One unresolved item also is identified in paragraph 8 of the enclosed inspection report.

We have also examined actions you have taken with regard to a previously identified inspection finding. The status of this item is identified in paragraph 11 of the enclosed report.
