

DOCKET
USNRC

Dear Secretary —

90 APR 17 P3:53

As a resident of W Chicago and Illinois I would like to express
~~for~~ my support of Illinois' request
to assume regulatory control over
the Kerr-McGee site in W Chicago.

We would feel safer knowing
that our own governing state
has control of the nuclear waste,
especially since the NRC does not
appear to be able to adhere to its
own guidelines for disposal
of such waste.

Please give our state the opportunity
to dispose of its own waste under
its own guidelines and tougher
regulations. (as filed & requested on 11/10/90)

9004240256 900417
PDR STPRG ES9IL PDR

Don't allow this waste to be
put in a highly populated area
where people literally live across
the street from the site. Since you
do not appear to be concerned with
this -- at least give our states
its right to regulate!

Sincerely -

Karen J. Belcher
Donald W. Belcher
