☒ N/A

Subject: IODINE-131 INCIDENT (UPDATE)

A special inspection has been scheduled at the licensee's facility to review the circumstances surrounding the report of an incident involving the administration of 10 millicuries of iodine-131 to a patient (Reference PN39308). The inspection activities will begin on February 25, 1993. Participating in the inspection will be a radiation specialist from Region III as well as a representative from the Idaho National Engineering Laboratory Misadministration Event Analysis Team (INEL/MEAT). The INEL representative will be responsible for reviewing the human factors aspect of the case.

NMSS and the State of Michigan are aware of this event. The information in this preliminary notification has been reviewed with the licensee.

This information is current as of 3:00 p.m. February 23, 1993.
