

FEB 26 1993

Docket No. 50-213

Mr. John F. Opeka
Executive Vice President - Nuclear
Connecticut Yankee Atomic Power Company
P.O. Box 270
Hartford, Connecticut 06141-0270

Dear Mr. Opeka:

SUBJECT: Haddam Neck Inspection 92-26

This letter transmits the report of the resident safety inspection conducted by Messrs. W. Raymond and P. Habighorst of this office during the period December 13, 1992 to January 9, 1993, at the Haddam Neck Plant, Haddam Neck, Connecticut. The report covers activities authorized by NRC License No. DPR-61. This inspection was focused on issues important to public health and safety. Preliminary findings were discussed with Mr. J. Stetz of your staff at the conclusion of the inspection.

During this report period, we found Haddam Neck was operated in a safe and conservative manner. Our inspection noted that your staff identified a failure to update surveillance procedures and drawings following a plant modification. We further noted aggressive actions to thoroughly evaluate and take appropriate corrective actions for this deficiency. Based on the above and the low safety significance of the issue, we exercised enforcement discretion for this oversight in accordance with Section VII.B of the Enforcement Policy.

We appreciate your cooperation.

Sincerely,

Original Signed By:

A. Randolph Blough, Chief
Projects Branch No. 4
Division of Reactor Projects

Enclosure: NRC Region I Inspection Report No. 50-213/92-26
