Re: License SMB-911

Dear Mr. Taylor:

I am contacting you based upon the recommendation of James Holloway of the Commission's Office of the Controller. Fansteel Inc. has held a license for its Muskogee, Oklahoma facility but is not currently processing any source material. I spoke with Mr. Holloway about the license because we are in the process of decommissioning the site and are trying to resolve whether the annual fee of \$67,100 is applicable. No processing activity has occurred since December 15, 1989. The Commission is aware of that fact. In fact, a decommissioning plan is currently being reviewed by the agency.

Please call me at your earliest convenience to discuss this matter.

Sincerely yours,

Michael J. Mocniak
