RS Holding, Inc.  
ATTN: Mr. R. A. Kempe  
President  
18530 South Hiles Parkway  
Cleveland, OH 44128

Gentlemen:

Enclosed is License No. 34-18156-01 which is essentially identical to License No. 34-08311-01 formerly held by Reuter Stokes, Inc. We shall consider the application dated March 23, 1978, as the application for renewal of License No. 34-18156-01 as requested in your letter dated May 26, 1978. Please note that we have placed an expiration date of September 30, 1978, on License No. 34-18156-01.

The application for license renewal requests authority for possession of cobalt-60 and cesium-137 sealed sources. The application does not identify the manufacturer(s) and model number(s) of the sources nor is there any indication of the maximum amount of radioactive material that will be in any single source. Please provide this information.

The application requests 100 millicuries as the amount of activity that will be in the Isotope Products Model No. L241-SS sealed americium-241 sources. We need to know the maximum amount of americium-241 which will be in any single source.

The application does not provide specific information concerning the use, handling, and disposal of the byproduct materials specified in your renewal application. We need to know your specific procedures for use and handling of the sealed sources and for use and handling of the radioactive materials in "any" form. Specific instructions for personnel should be prepared which incorporate your procedures for use, handling, and disposal of the radioactive materials. The enclosed licensing guide may be helpful to you in preparation of your procedures and instructions.
