TITLE:

Procedures and Criteria for On-Site Storage of Low-Level
Radioactive Waste

RIN:

3150-AE22

CFR CITATION:

10 CFR 30; 10 CFR 40; 10 CFR 50; 10 CFR 70; 10 CFR 72

ABSTRACT:

The proposed rule would amend the Commission's regulations for reactor, material, fuel cycle, and independent spent fuel storage licensees. The proposed rule would establish a regulatory framework containing the procedures and criteria that will apply to on-site storage of low-level radioactive waste (LLW), beyond January 1, 1996. The Commission has determined, under the authority of the Atomic Energy Act of 1954, as amended, that these changes are required because of potential health and safety concerns associated with the increased reliance upon on-site storage of LLW. The proposed rule is intended to support the goals that have been established by the Low-Level Radioactive Waste Policy Amendments Act of 1985 (Act).
