RE: Follow up reply to a Notice of Violation
License No. 21-01190-05
Docket No. 030-02005

Dear Mr. Caniano,

This letter refers to our previous correspondence dated February 17, 1993, and addresses the concerns brought forth by Mr. Michael McCann of the licensing division as relayed to our RSO, Mr. Ross Bunting, during their telephone conversation of March 5.

We confirm that the RSO will be on site at Detroit Riverview Hospital on at least a weekly basis for a minimum of four hours. We confirm that he will be actively involved in the radiation safety programs of the nuclear medicine section to insure the safe and proper use of licensed materials. This will include active participation in the quality management program, the evaluation of misadministrations, the review of required records, instructions to personnel (Part 19 requirements, ALARA, and proper procedures), the review of written policies and procedures, and an active "performance basis" review of daily activities and procedures. To insure proper communication, we have appointed Mr. William Sims, Radiology Department Director, to act as an on-site liaison with the RSO.

Please contact me if further information is needed.

Sincerely,

Jack Ryan, M.D., F.A.C.P.E.
President and Chief Executive Officer
