MAY 4 1993

MEMORANDUM FOR: The File

FROM: Ronald D. Hauber, Assistant Director
for Exports, Security, and Safety Cooperation
Office of International Programs

SUBJECT: EXEMPTION TO 15-DAY WAITING PERIOD FOR ISSUANCE OF
EXPORT LICENSE XSNM02744

On April 23, 1993, NRC received an export license application (XSNM02744) from Siemens Power Corporation, requesting a license to export 75.0 kilograms uranium-235 contained in 1,500.0 kilograms uranium, enriched to 5.0 w/o maximum, in the form of crystalline uranium hexafluoride for use as working stock for LWR fuel fabrication in the Federal Republic of Germany.

The applicant has requested expeditious processing of the license request as the material is ready for immediate shipment and is urgently needed. The staff has concluded that the proposed export license application meets the requirements of the Atomic Energy Act, as amended, and would not be inimical to the common defense and security of the United States.

In view of the above considerations, the staff issued the export license without the normal 15-day waiting period.

Ronald D. Hauber
