Gentlemen:

**VIRGINIA ELECTRIC AND POWER COMPANY**  
**COMMENTS ON PROPOSED GENERIC LETTER**  
**MODIFICATION OF THE TECHNICAL SPECIFICATION ADMINISTRATIVE**  
**CONTROL REQUIREMENTS FOR EMERGENCY AND SECURITY PLANS**

Virginia Power has reviewed the Nuclear Regulatory Commission's (NRC's) Federal Register notice dated April 1, 1993 which proposed to issue a generic letter. This draft generic letter provides guidance to nuclear power plant licensees on the removal of administrative control requirements for emergency and security plan audits from technical specifications that are adequately addressed by other existing regulation.

We endorse the proposed generic letter and commend the NRC for their activity in proposing line-item technical specification improvements, including this elimination of duplicative requirements.

Very truly yours,

  
W. L. Stewart
