NRC STAFF SUPPLEMENTAL RESPONSE TO THE COOPERATIVE  
CITIZEN'S MONITORING NETWORK'S DISCOVERY REQUESTS

The NRC Staff supplements its January 12, 1993 responses to discovery requests, filed by the Cooperative Citizen's Monitoring Network ("CCMN") in the above-captioned proceeding, by identifying an additional document responsive to CCMN Request 2.

Discovery Request No. 2:

All the experiments and measurements done on Boroflex [sic], under laboratory conditions, at all stages of use in spent fuel pools under conditions similar to Millstone II, and on materials in and from the SFP at Millstone II. This should include all assumptions, parameters of experiments, experimental data, summary of experiments, models and computer programs with all assumptions specified, input with all sources of data referenced, computer runs (output), and conclusions.

NRC Staff Supplemental Response:

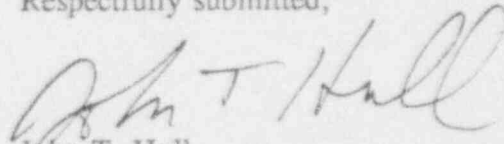

Without waiving any of its objections stated in its January 12, 1993 response, the Staff identifies the following document:

9305130062 930507  
PDR ADDCK 05000336  
G PDR

0507

Electric Power Research Institute report, numbered TR-101986, *Boraflex Test Results and Evaluation*, dated February 1993.<sup>1</sup> Copies of this report are appended to the supplemental responses served on CCMN, Dr. Michio Kaku, and counsel for Northeast Nuclear Energy Company.

Respectfully submitted,

John T. Hull  
Counsel for NRC Staff

Dated at Rockville, Maryland  
this 7th day of May, 1993

---

<sup>1</sup> This report is being labelled as NRC Document 2(o), to be consistent with the list of documents provided as an attachment to the Staff's letter to CCMN dated December 31, 1992.
