Dear Sir,

Right now as you know our environment is getting worse every day. Man has come up with ways to save our earth. One way is nuclear energy. Even though I think its a good idea, I dont like the idea for a factory to be between two small communities. Do you realize that you'll be dumping 4,000 tons of radioactive waste! If just one slip-up occurs, it could spell total disaster. I feel you should go over your plans and choose a different site. Thanks for your time. I hope I got through.

Sincerely yours,
Jeremy Antley age 11
