Ivan Selin, Chairman
Nuclear Regulatory Commission
Washington, DC 20555

70-13070

Dear Chairman Selin,

I am writing in regards to the proposal from
Louisiana Energy Services to build an enriched
uranium factory in Forest Grove and Center Springs.
I am concerned with the amount of toxic
waste produced and the safety of the water
and health of the community surrounding.
I urge you to carefully research this proposal.
I think it would be fair to meet with the people
in these communities and listen to their concerns.
Please make a decision that allows a compromise
between LES and environmental safety.

Thank you for your time.

270073

Sincerely yours,
Ariel Hubbard (15)

Please respond to my letter.
