Dear Sir:                      Re: Your letter of March 9, 1971

I had written a letter to President Nixon and do not feel that our government is enough concerned by the nuclear power plants being built across the country.

I do not want to see the Davis-Besse Nuclear Power Plant built in Ohio. What must a concerned citizen do to have a views get across to public officials?

I was very pleased to see that Governor John J. Gilligan is helping with our fight on nuclear pollution as per the article appearing in The Plain Dealer, March 13, 1971. What are you doing?

When I had heard about the Campbel Report requested by President Kennedy in 1966, in which it was found that we have only a 30 year supply of uranium and a 7,000 year supply of fossil fuel, I am strongly opposed to the Davis-Besse-Nuclear Power Plant. It doesn't make sense to build a plant and have it obsolete in 30 years. Why should our lives be endangered because of nuclear pollution and possible human error for 30 years?

If all else fails and the plant is built, I feel the Cleveland Electric Illuminating Co. and Toledo Edison should be responsible for any accidents or damage to our environment. I would like to see a bill repealing the Price Anderson Act and thereby placing the two companies in a position of normal corporate responsibility for damage they can create.

Do help us fight to save our environment and our people.

Yours truly,

*Mrs. Dennis J. Lynch, Jr.*
