MEMORANDUM FOR: Robert W. Reid, Chief, Operating Reactors Branch No. 4
FROM: John F. Stolz, Chief, Light Water Reactors Branch No. 1
SUBJECT: REVIEW OF OVERPRESSURIZATION PROTECTION AT CRYSTAL RIVER UNIT 3

It is requested that action be initiated by you to review the licensee's letter response dated February 17, 1977, regarding measures available to prevent overpressurization of the reactor pressure vessel at Crystal River Unit 3. This letter was in response to our request dated January 7, 1977.

This action is requested because the transfer memorandum for Crystal River Unit 3 is still in the process of management concurrence and because the memorandum anticipates that your branch will assume the management responsibility for this item with technical review by the Division of Operating Reactors Technology.

Copies of the licensee's letter have been distributed to DORT. A copy of the letter is enclosed for your use.

Original Signed by
John F. Stolz

John F. Stolz, Chief
Light Water Reactors Branch No. 1
Division of Project Management

Enclosure: Ltr dtd 2/17/77
