FEB 25 1977

Commonwealth Edison Company  
ATTN: Mr. R. L. Bolger  
Assistant Vice President  
Post Office Box 767  
Chicago, Illinois 60690

Gentlemen:

RE: DRESDEN NUCLEAR POWER STATION UNIT NOS. 1/2/3  
QUAD CITIES NUCLEAR POWER STATION UNIT NOS. 1/2

This letter is being sent to all licensees authorized to operate a nuclear power reactor and to all applicants with applications for a license to operate a power reactor (FSAR docketed) to advise you that the Nuclear Regulatory Commission has forwarded to the FEDERAL REGISTER amendments to its regulations 10 CFR Part 50, "Licensing of Production and Utilization Facilities", and 10 CFR Part 73, "Physical Protection of Plants and Materials". These new regulations identify measures to be taken for the protection of nuclear power reactors against industrial sabotage. Copies of these new requirements are enclosed. Of particular interest is the adoption of a new section 10 CFR 73.55, "Requirements for physical protection of licensed activities in nuclear power reactors against industrial sabotage". The new regulations require that you submit an amended physical security plan within 90 days of the publication of the rule in the FEDERAL REGISTER describing how you plan to comply with the requirements of 10 CFR 73.55, including schedules of implementation.

To provide additional detailed guidance on implementing the new rule, we are scheduling regional meetings to discuss the requirements of 10 CFR 73.55, to present an acceptable format and content for the required amended physical security plan and to provide preliminary acceptance criteria which the NRC staff will use to determine the acceptability of submittals. An agenda for these meetings is enclosed, including the dates and location of the meeting for each NRC Region and supplemental information related to some of the topics listed on the agenda. In order to provide a forum for effective discussion, you are requested to send no more than four representatives to the meeting. You may wish to include your A/E or security consultant within this number. Please complete the

FEB 25 1977

The Commission has under active consideration a requirement that security clearances be obtained for certain licensee employees. We will present an overview of this proposal at the meeting and will consider any comments that you wish to give.

The Commission also has under development amendments to its regulations that would require nuclear power plant licensees to develop and follow safeguards contingency plans for dealing with threats, thefts, and sabotage relating to special nuclear material and nuclear facilities. A presentation and discussion on this subject is on the meeting agenda and background information on this subject is also enclosed.

If you have any particular related topics or generic safeguards problems that you would like discussed at the meeting, please let us know. For any further information or comments, please contact James R. Miller of my staff (301/492-7014).

Sincerely,

*Original signed by*
