DOCKET NUMBER
PROD & UTIL. FILE

50-289

Dec. 19 1980

The Honorable John F. Abner
Chair person
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Commissioner

I have never written a letter like this sort before and you have probably heard what I am about to say from others than my self. I am a retired Senior Citizen 75 years of age living out my few remaining years on Cape Cod for the past six years with my wife.

We are existing on my Social Security only plus a small fixed pension and what were dividends from 500 shares of General Public Utilities dividends.

I don't have to tell you that I depended on these dividends and with the cost of living rising ever higher the share is starting to pinch quite hard and is creating a hard ship.

I strongly urge you to speed up the restart of T.M-1 so that I can see the light at the end of the Tunnel

if you will pardon my saying so I frankly cannot understand why we in these United States of ours are so far behind the European nations in embracing nuclear power. I do not say this because I own G.P.U. stock but I strongly feel this is the way to stop the importation of fuel oil from the arab countries than to you listening

Sincerely
Alfred J. Reghitto
