

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

JAN 3 1981

Mr. MacNeil
Box 84
Greensboro, VT 05841

Dear Mr. MacNeil:

This letter is in response to your recent letter to the Nuclear Regulatory Commission regarding Vermont Yankee. The Commission has received several other communications about Vermont Yankee, including one from the Vermont Yankee Decommissioning Alliance dated November 27, 1980, which made requests similar to those contained in your letter.

Since all the concerns expressed in the various letters are summarized in the November 27, 1980 letter from the Vermont Yankee Decommissioning Alliance, the Commission has decided to consolidate the various letters into a request for action pursuant to 10 CFR Section 2.206 of the Commission's regulations. The matter has been referred to me for decision. A copy of my decision is enclosed for your information.

I share your concern for nuclear safety, and will continue to enforce the Commission's safety regulations.

Sincerely,

Victor Stello, Jr.
Director
Office of Inspection
and Enforcement
