

DOCKET NUMBER 32-33, 32, 70, 150  
PROPOSED RULE (43 FR 70374)  
SMELTED ALLOYS

002649

December 10, 1980  
Gentlemen of the Commission,

Please do not make us  
apprehensive, suspicious, and  
frightened by products manu-  
factured in the United States.

Aside from obvious danger  
to health, or even threat of it,  
think of resulting law suits  
over real or imaginary ills.  
And think of the trade balance  
as imports could be encouraged,  
exports perhaps refused.

In sum: I beg you to  
countermand the proposed  
amendments permitting "low level"  
uranium content in metal sold  
for commercial use.

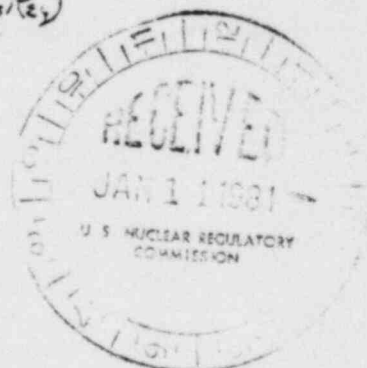

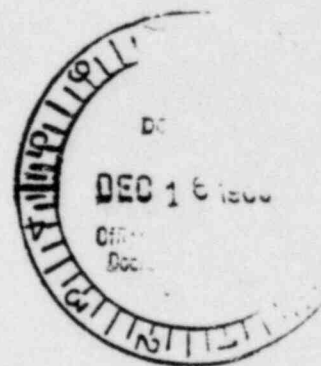

Sincerely,

Julia Robinson (Mrs. Re)

Mrs. Reg Robinson
