

James H. Adams
Chairman
U.S. Nuclear Regulatory Com.

Dear Sir,

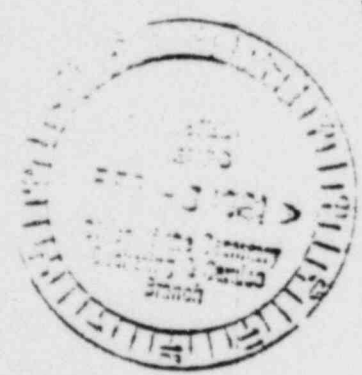

I believe the "utility people" of this country are devoted to reliability. Without question they work hard about nuclear energy production for various activist groups who spread scare statistics to an uninformed public. These groups by in large send to mail boxes, no work, jobs at the expense of the utilities company, corrupting the bill paying public.

Please act swiftly to remove TMI-1 (Exhibit 50-28952) to remove anomalies, since it has been modified. The working public should be made subject to further research. Dollars by delay.

Sincerely,

W. Hempstone
