ATOMIC SAFETY AND
LICENSING BOARD PANEL

01 FEB 27 P3:25

RECEIVED

Dear Chairman Smith:

I am totally opposed to the pre-
opening of TMI I. Evacuation planning
in our country is in its initial stages
at best — as you know, an opinion FEMA
conveys in. Your own rules state a
plan has to be implementable by April 1.
At the rate planning is going (essentially
unchanged from 3/79) the area around

TMI couldn't be redesigned for
for years, if ever. The NRC as the
regulatory overseer for the valuable
public, just has to accept that certain
nuclear plants were placed in
populated areas and
shut down.

DSB
6/10

Sincerely,

Norm E. Rescorla
