

NOV 25 1981

Docket No. 50-289

Metropolitan Edison Company
ATTN: Mr. H. D. Hukill
Director, TMI-1
P.O. Box 480
Middletown, Pennsylvania 17057

Gentlemen:

On July 29, 1981, the Division of Licensing (DL) completed the review of your application dated November 7, 1980, and issued Amendment 70 to the facility license for TMI-1. Fees pursuant to 10 CFR 170.22 were not remitted with your application because you determined that this application was a modification to a previously submitted change.

Based on information provided by the DL staff as the result of their final review of your application, it has been determined that a Class III fee (\$4,000) is appropriate for the November 7 application since this submittal increased the scope of your August 19, 1977 application to include adequacy of station electrical distribution system. Consequently, it has been determined that this portion of the application is subject to fees and involved consideration of a single safety issue. Therefore, it is requested that your Company remit the sum of \$4,000 to our office for the November 7 application.

Sincerely,

Original Signed by
Wm. O. Miller

William O. Miller, Chief
