NOV 26 1981

DOCKET NO: 70-2917
 APPLICANT: Tennessee Valley Authority
 FACILITY: Bellefonte Nuclear Plant Unit 1
 SUBJECT: LICENSE AMENDMENT APPLICATION DATED OCTOBER 7, 1981

I. Background

Tennessee Valley Authority is licensed under NRC Materials License No. SNM-1865 for the receipt and storage of fuel and accessories for eventual use in the Bellefonte Nuclear Plant Unit 1. The license is scheduled to expire December 31, 1981. The application requests that the license expiration date be extended to March 31, 1982.

II. Discussion

The need for an extension of the license expiration date is due to construction delays. Extending the expiration date does not affect the radiological safety, nuclear safety, or other parameters on which the issuance of the license was based.

III. Recommendation

On the basis of the above, I recommend that the license extension, as requested by the licensee, be approved.
