Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
Docket Nos. 50-250 & 50-251
Proposed Emergency Plan

Enclosed are draft implementing procedures for the proposed Turkey Point Units 3 & 4 Radiological Emergency Plan submitted on January 2, 1981. The Radiation Release and Dose Projection Procedure is not yet finished and will be submitted under a separate cover by April 1, 1981.

We have received NRC review comments on the proposed Turkey Point Radiological Emergency Plan submitted on January 2, 1981. We will address the review comments, revise the proposed Plan and associate Implementing Procedures if necessary, and submit the approved plan and Implementing Procedures by April 1, 1981.

We plan to begin implementation of the new Radiological Emergency Plan at the same time that the Florida Radiological Emergency Plan for Nuclear Power Facilities is implemented. This is scheduled for April 1, 1981.

Delays in delivery and installation have disrupted the schedule for the new meteorological equipment and the Appendix I computer installation at Turkey Point. We are currently reassessing these projects and establishing new schedules.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
