Region III
Mr. D. G. Wiedeman, Acting Chief
Materials Radiation Protection
Section 1
799 Roosevelt Rd.
Glen Ellyn, IL 60137

November 30, 1981

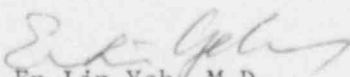

Dear Mr. Wiedeman:

Regarding your letter dated November 19, 1981 of Notice of Non-compliance, I will make the following statements under oath:

1. Radiation level and contamination surveys will be performed on a weekly basis. Corrective action is taken to reinforce the duty of the responsible personnel. More strict supervision and double checking mechanisms are established to ensure that the guideline is fulfilled.
2. Dose calibrator will be tested for linearity quarterly. The non-compliances occurred in 1979 and 80. In fact, it had already been rectified in 1981. We will continue to comply with guideline and prevent the non-compliance from recurrence.
3. Radiation Safety Committee will meet on quarterly basis. Lack of enthusiasm among the committee members is the main cause of the non-compliance. The members are strongly persuaded to attend the meetings. Future meetings will be held quarterly, even though absenteeism is significant. If necessary, the membership will be restructured to improve the attendance.

The above corrective actions are in effect immediately.

Sincerely,

En-Lin Yeh, M.D.
Director
