bcc: Applicant & Service List

DEC 17 1981

Docket Nos.: STN 50-454
and STN 50-455

APPLICANT: Commonwealth Edison Company
FACILITY: Byron Station
SUBJECT: SUMMARY OF GENERIC ISSUES MEETING

A meeting was held December 8, 1981 in Bethesda, Maryland with representatives from Commonwealth Edison and their consultants to discuss the information requested concerning Unresolved Safety Issues (USI's) for the Byron SER. A list of attendees is given in Enclosure 1.

The staff explained that the recent practice in writing Appendix C to the SER concerning USIs is to ask the applicant for supplemental information to make the staff's generic writeup somewhat plant specific. In response to our November 10, 1981 request, the applicant was directed to provide information on any research or studies involving USIs that relate directly to Byron. The response to this request for information needs to be available to the staff by December 16, 1981 in order to include the supplemental information in the SER.
