Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attn: Mr. Robert A. Clark, Chief
Operating Reactors Branch #3
Division of Licensing

Subject: Calvert Cliffs Nuclear Power Plant
Unit No. 1 & 2, Docket No. 50-317 & 50-318
Withdrawal of Request for Amendment

Reference: BG&E Letter dated 11/17/81 from A. E. Lundvall,
Jr. to H. R. Denton, Request for Amendment

Gentlemen:

The referenced letter contained a request to change the Calvert Cliffs Technical Specifications for radiological monitoring to be consistent with the NRC's Radiological Assessment Branch Technical Position (11/79) and 10 CFR50 Appendix I.

We wish now to withdraw the referenced request. We have determined, through conversations with our NRC Project Manager, that no substantive NRC review of the referenced request has taken place and that the matter may be more appropriately addressed as a part of the upcoming NRC review of the entire Calvert Cliffs Appendix I technical specification package, scheduled to take place at Calvert Cliffs on January 25-26, 1982. Accordingly, we request that the referenced application be cancelled and our fee submittal in the amount of \$4,400.00 be reimbursed.

Very truly yours,

R. C. L. Olson
Principal Engineer
Nuclear Licensing & Analysis Unit
