MIDLAND DOCKET NOS 50-329, 50-330  
PART I RESPONSE TO NUREG-0612  
CONTROL OF HEAVY LOADS AT NUCLEAR POWER PLANTS  
FILE: 0963 SERIAL: 14928

Reference (A) J W Cook Letter to H R Denton, Serial 12219,  
Dated June 18, 1981

Enclosure (1) Midland Units 1 & 2 - Part I Response - Control of Heavy  
Loads at Nuclear Power Plants (NUREG-0612)

Reference (A) stated that a report of CP Co's review of controls for handling heavy loads would be submitted to the Staff by December 30, 1981. As outlined in D G Eisenhut's letters of December 22, 1980 and February 3, 1981, CP Co's review is being conducted in two phases. The results of Part I review are enclosed and address the general requirements for the control of heavy loads. Part II review, addressing specific requirements for the control of heavy loads in spent fuel, reactor vessel and other safe shutdown areas, is still underway. We expect this phase to be completed in the near future and we plan to submit the Part II response by February 26, 1982.
